RAG Corpus and Skill Source Report

Retrieved: 2026-08-30. Only `docs/ingested/**/*.{txt,md,yaml}` is indexed. Original PDF, DOCX, and HTML files are retained beside mechanically extracted text. SHA-256 hashes for every retained and indexed file are in `CORPUS_SHA256.txt`.

Prompt and skill sources

Publisher	Material copied or ingested	Local evidence	Source / license
GitHub	Spec Kit templates plus `specify`, `clarify`, and `analyze` command prompts; commit `51e52be6c3b26fed3ff5424c671f4a559519a759`	`docs/ingested/spec-kit/`	https://github.com/github/s kit/tree/51e52be6c3b26fed retained
Suzgun & Kalai	Meta-prompting prompts and repository documentation; commit `40422564938d772c3e3e6b9614b1df48b8dd6a08`	`docs/ingested/prompting/meta-prompting-*` and `expert-generic-instruction.txt`	https://github.com/suzgunn prompting/tree/404225649 license retained
HubSpot-hosted webinar	Agent Prompt Optimization Webinar	`docs/ingested/prompting/hubspot-agent-prompt-optimization.pdf` and `.txt`	https://20083050.fs1.hubsp na2.net/hubfs/20083050/A

The runtime skill is `skills/finance-requirements-document/SKILL.md`. It points to the retained Spec Kit material instead of reproducing a second synthetic framework.

Exclusions and limitations

- The previous model-generated finance templates, samples, regulatory catalog, and SDLC scoring model were removed from the indexed corpus.
- `meta-prompting.com` was not ingested because the site could not be reliably retrieved or verified during this run. The published MIT research repository and HubSpot-hosted webinar are used instead.
- FATF material was identified but its publisher blocked automated retrieval (HTTP 403); it was not copied or represented as ingested.
- Publisher documents are evidence, not automatic proof of legal applicability. Jurisdiction, entity scope, amendments, and legal interpretation require an authorised reviewer.
